Veolia to support one of BP's biggest gas field development projects

BP has selected Veolia to design, build and operate a raw water treatment plant for its project to develop the Khazzan gas field, located southwest of Muscat in the Sultanate of Oman.

By winning BP's call for tenders in the Sultanate of Oman to build a plant that will start providing water from January 2015, Veolia will contribute to one of BP's largest current projects : the development of the Khazzan gas field, located 350 km southwest of Muscat.

Water production is an essential step in implementing this project, which is highly significant for the Omani economy, and which is planned to comprise up to 300 gas wells to deliver, in 2017, plateau production of 28.3 million cubic meters of gas per day.

The circa USD \$50 million water treatment facility has a maximum capacity of 6,000 m³/day, split between 4,000 m³/day of process water and 2,000 m³/day of drinking water. Veolia will operate the plant for one year, with extension options of up to four additional years.

This latest success is further evidence of Veolia's capacity in the gas sector. "In some regions of the world, it is no longer possible to submit a development project for an oil or gas field without including the water aspect," said Antoine Frérot, Veolia's Chairman and CEO. "There is therefore strong growth potential in this sector, especially for water treatment installations."

.....

Veolia is the global leader in optimized resource management. With over 200,000 employees* worldwide, the company designs and provides water, waste and energy management solutions that contribute to the sustainable development of communities and industries. Through its three complementary business activities, Veolia helps to develop access to resources, preserve available resources, and to replenish them.

In 2013, Veolia supplied 94 million people with drinking water and 62 million people with wastewater service, produced 86 million megawatt hours of energy and converted 38 million metric tons of waste into new materials and energy. Veolia (Paris Euronext: VIE and NYSE: VE) recorded revenue of €22.3 billion* in 2013. www.veolia.com (*) Excluding Transdev employees and revenue currently under divestment
